Full Stack Developer with experience in building modern, accessible, and responsive web applications. I have contributed to user-focused projects at Wisecode and Farmalive, improving the usability of their platforms. I work with technologies such as Angular, Vue.js, Laravel, TypeScript, HTML, CSS, and JavaScript, as well as frameworks like Tailwind, Bootstrap, and PrimeNG. I specialize in development best practices, consuming REST APIs, and collaborative work in agile environments.

PROFESSIONAL EXPERIENCE

Farmalive Sapi de CV

Junior Full Stack Developer

Pachuca, México

January 2025 – July 2025

- Redesigned a website module by implementing UX/UI best practices, modern animations, accessible forms, and structure aligned with WCAG 2.1 standards.
This redesign helped the company obtain an accessibility certification and significantly improved its corporate image and digital presence.
- Developed **SEALIVE**, a full-stack platform for managing home delivery logistics. The system included role-based access control, alerts, filters, activity logs, and a responsive design optimized for mobile devices. Enhanced user experience by optimizing connection handling and request processing, which reduced wait times and improved overall system performance. This solution increased operational efficiency by 60% in pharmacies and internal departments.
Stack: Angular, Laravel, Tailwind, PrimeNG, MySQL.
- Automated the client registration workflow through a smart form with OCR integration, real-time validation, automatic email delivery, and interactive visual confirmation.
This reduced data entry errors and shortened service times by 20%.

WiseCode

Frontend Developer Junior

Pachuca, México

August 2024 – December 2024

- Collaborated with the senior developer on visual tasks, bug fixing, and testing in Angular-based projects. These contributions helped improve development and feature delivery speed by 20%.
- In the **CGSMContraloría** project, I participated in the implementation of CRUD views and components conditioned by user roles and permissions. I also proposed and applied UX/UI improvements.
- In the **Bomeri** project, I independently developed a complete module of the system with a responsive design and visual enhancements. This work accounted for 25% of the total frontend module.

EDUCATION

UNIVERSIDAD POLITECNICA DE PACHUCA
